STORM SEWER STRUCTURE REPAIR TO START ON WASHINGTON STREET AND 7TH AVENUE

An emergency storm sewer structure repair will be starting on Thursday, August 23, 2012, on **Washington Street** at the southeast corner of the 7th Avenue intersection in West Bend. The work will begin between 8:00 AM and 9:00 AM and should be completed by mid-afternoon. The concrete will then take 24 hours to cure, weather permitting.

The streets will remain open to traffic during the construction, but due to the restricted lanes caused by the bridge construction project, left turns for westbound traffic from Washington Street onto 7th Avenue will be prohibited at various times. Motorists are asked to exercise caution, observe construction signs, obey flagmen, and be alert for heavy construction equipment, while work is in progress. Alternate routes should be selected if possible.

T.P. Concrete, Inc., of Fredonia, Wisconsin, will be doing the work for the City of West Bend.

If you have any questions about this news release, please contact the City's Engineering Department at (262) 335-5130.
